San Diego, CA, November 20, 2024 — Voyage Audio is excited to announce the release of Spatial Mic Converter Plugin v1.7.7. This latest version introduces new features and optimizations for users of Spatial Mic Dante and Spatial Mic USB, including an additional end-fire orientation mode, a 4.0.4 surround format, and various performance improvements. These updates are recommended for all users and are available for free download at <https://voyage.audio/downloads>.

New Orientation and Surround Format Options

Spatial Mic Converter Plugin v1.7.7 introduces an extra end-fire orientation mode to give users more flexibility when capturing audio.

“Feedback from our customers is essential to the continual development of our products. When we learned that users often mount Spatial Mic in both an upward and downward end-fire configuration, we enhanced the software to accommodate.” said Voyage Audio co-founder, Colin Ritchie.

Additionally, the new 4.0.4 surround format expands the plugin’s utility for multi-channel environments, particularly beneficial in broadcast and post-production applications. This format is ideal for audio engineers and sound designers working in configurations where dialog is handled by a center channel, and LFE is supplied separately.

Performance and Compatibility Enhancements

Built with the latest SDKs, Spatial Mic Converter Plugin v1.7.7 brings improvements in graphics stability, performance, and compatibility, ensuring a smoother, more reliable user experience across platforms.

About Voyage Audio

Voyage Audio was founded in San Diego, CA to design, build, and market innovative microphones and software for audio recording and production. With a rich history in electronics and music, and over 30 years of combined experience designing and building microphones, the Voyage Audio team has brought dozens of products to market for major mic manufacturers, winning both Pro Audio Review and TEC awards. Spatial Mic, their first product, was named “Best of NAMM 2020” by multiple media outlets and Spatial Mic Dante received “Best of Show” at NAB 2024 by Mix Magazine.

Voyage Audio continues to innovate and enhance its products, providing the audio community with cutting-edge tools for superior audio production.
